

## **Taskforce Policy & Regulation**

Taskforce Policy & Regulation is responsible for establishing a long-term policy framework and economic incentives in order to promote the wide implementation of CCS, including all new and existing projects.

This includes implementing the following tasks:

- |     |  |
|-----|--|
| 1   | Working closely with the EU in order to identify regulatory issues                               |
| 1.1 | Regulatory work DG TREN, ENV and other relevant DG's   |
| 1.2 | Public funding for R&D (e.g. FP7, JTI, EIB)  |
| 2   | Coordinate and interface between ETP-ZEP taskforces and EC, related institutions&nat.governments |
| 3   | Developing commercial incentives as outlined in the SDD (e.g. EU ETS, Early Mover Fund)          |
| 4   | Ensure that CCS is introduced under the ETS  |
| 5   | Propose necessary regulation corresponding to greenhouse gas avoidance costs                     |
| 6   | Map Member States' involvement and disseminate best practice to national governments             |

Taskforce Policy and Regulation will take the lead in the dialogue with the European Commission to improve the regulatory framework.
